WORK EXPERIENCE

Lead - Data & Analytics

amber

May 2025 – Present

Pune, India (On-site)

- Built amber Prism, an internal AI product for ops quality audits, agent call/communication transcript analysis and multi-dimensional sales-pipeline insights - adopted by 100+ daily active users across Sales, Ops and Leadership.
- Devised & built amber Ocean, an in-house AI data product with semantic layer, skills and agentic routing, generating on-demand analysis reports, RCAs, charts, tables and SQL queries with token optimizations - costing under \$100 per 15,000 user sessions.
- Developed amber Radar, a revenue-generating market research and data insights tool providing demand, supply and pricing analysis with forecasting using Next.js, internal/public data sources and ML models - now used by 50+ UK property management groups and investors.
- Migrated all Tableau dashboards to self-hosted Superset, saving \$10,000+ annually with 25% faster dashboard rendering.
- Optimised AWS DMS, Tableau queries & Metabase caching - reduced 2 Redshift instance nodes, cut avg. query runtime by 30 mins, and saved \$600+/month.
- Automated multiple product, marketing, sales and security reports using Python for data automation, Ollama for AI-generated insights & n8n for multi-channel workflow triggers.

Lead Business Analyst

Turing

Nov 2024 – Apr 2025

Palo Alto, California, USA (Remote)

- Created multiple dashboards using SQL and Looker Studio to enhance business process visibility and growth metrics.
- Solved for automated feedback categorization using NLP, NLTK and spaCy Python modules for business process optimization.
- Developed a Python model with 80% accuracy in identifying AI-generated content vs human-generated content to reduce AI plagiarism.
- Performed high-quality prompt engineering for 150+ RLHF & SFT annotations across various multimodal projects to help improve model performance and MMMU benchmark.

Associate Product Manager

5X Data

Oct 2023 – Sep 2024

Singapore (Remote)

- Spearheaded the end-to-end product development using agile methodologies - launching over 15 new features, 5 feature revamps, and 2 full products.
- Developed a usage-based billing system to resolve third-party dependencies, reducing invoicing errors and saving \$2000/month.
- Re-engineered rule-based granular user identity access management solutions, boosting revenue by \$10,000/month.
- Ideated and implemented Streamlit-based custom data apps that attracted a revenue of \$20,000/month from enterprise clients.
- Reimagined the Utilization page to optimize UI, data quality and forecast prediction model, enhancing accuracy by over 50%.

Product Analyst

Junglee Games

Jun 2021 – Nov 2022

Gurugram, India (Hybrid)

- Designed and developed Tableau BI dashboards to report campaign views, clicks, conversions, and other business metrics.
- Orchestrated alerts to report double-spends and system failure issues using SQL and Cron, optimizing incident response time.
- Implemented a goal-based reward system by integrating the instant cash microservice with marketing automation tool to drive user engagement and A/B testing, improving user reactivation by a weekly average of 20% and retention by 10%.
- Conceptualized and introduced 5 new features within their in-house marketing automation tool for seamless product marketing – A/B testing outlier filter, in-app notifications, scratch cards, dynamic variable and spin the wheel.
- Played a key role in designing and executing Poker launch Go-To-Market strategies and on-boarding funnels, achieving ₹1.2 lakh revenue per day, within 18 days of launch, with a growth of 5% per day.

EDUCATION

Birla Institute of Technology and Science Pilani (BITS Pilani)

B.E. Chemical + M.Sc. Chemistry + Minor in Finance

Aug 2015 – May 2021

Goa, India

- Finance Project:** Nature, Role and Performance of Capital Investments in NBFCs – developed correlation models using Python around financial parameters like ROE, ROA, ROCE, current ratio, total assets and valuation to rank 10 NBFCs and 5 Banks.

SKILLS & TOOLS

Languages: SQL (Certified), Next.js, Typescript, Node.js, React Native, Python for Data Science (Certified) – NumPy, Pandas, Matplotlib, Seaborn, SciPy, NLP, NLTK, LangChain, Streamlit, Scikit-Learn, PyScript, BeautifulSoup (web scraping)

Skills: Data Analytics & Visualization, Problem Solving, Agile, Product Strategy & Engineering, Wireframing, User Experience, QA Testing, Debugging, Root Cause Analysis, A/B Testing, Workflow Automation, Vibe Coding, Prompt Engineering, Agentic Systems, RAG

Tools: AWS - S3, ECR, EC2, Lambda, DMS, Redshift; Jenkins, n8n, JIRA, GitHub, Postman, Looker Studio, Metabase, Tableau, BigQuery, PostgreSQL, Snowflake, MongoDB (NoSQL), Google Analytics, PostHog, Mixpanel, Claude, OpenClaw, OpenCode, AntiGravity
